Summary

Frontend developer and Computer Science & Engineering graduate with hands-on experience building responsive, interactive, and user-friendly web applications. Proficient in HTML5, CSS3, JavaScript (ES6+), React.js, Tailwind CSS, Redux Toolkit, Context API, REST APIs, Axios, TanStack Query, Git, GitHub, Vercel, GSAP, and ScrollTrigger. Experienced in responsive web design, component-based architecture, reusable components, DOM manipulation, client-side state management, CRUD operations, API integration, and interactive UI development.

Technical Skills

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frontend Development: React.js, Tailwind CSS, Responsive Web Design, Mobile-First Design, Component-Based Architecture, Reusable Components

React & State Management: React Hooks, React Router, Redux Toolkit, Context API, Local State Management

API & Data: REST APIs, Axios, TanStack Query, JSON, Asynchronous JavaScript

UI & Animation: DOM Manipulation, Event Handling, GSAP, ScrollTrigger, Interactive UI, Responsive UI

Development Tools: Git, GitHub, VS Code, Chrome DevTools, Vercel

Technical Projects

SkyMart—E-Commerce Web Application

Live Project

- Developed a responsive e-commerce frontend using React.js, Tailwind CSS, JavaScript, and reusable component-based architecture.
- Integrated REST APIs using Axios and asynchronous JavaScript to fetch and display product data dynamically.
- Implemented product search, category filtering, price sorting, and product detail functionality.
- Used Redux Toolkit for cart management and centralized application state handling.
- Implemented React Router for navigation and structured application routes.
- Built responsive product interfaces for different screen sizes and deployed the application using Vercel.

Productivity Dashboard—Web Application

Live Project

- Developed an interactive productivity dashboard using HTML5, CSS3, and JavaScript.
- Implemented DOM manipulation and event handling for dynamic user interface updates.
- Created responsive and mobile-friendly layouts using modern CSS techniques.
- Added smooth animations and interactive UI transitions using GSAP and JavaScript.
- Focused on clean UI structure, usability, responsive design, and consistent user interactions.

FinTrack—Personal Finance Tracker

Live Project

- Built a responsive personal finance tracker using HTML5, CSS3, and JavaScript.
- Implemented client-side logic for managing income, expenses, transactions, and financial calculations.
- Integrated charts to visually represent financial data and improve dashboard usability.
- Used JavaScript DOM manipulation and event handling for dynamic interface updates.
- Designed a clean and user-friendly dashboard for presenting financial information clearly.

Task Overview—Task Management Application

Live Project

- Developed a responsive task management application using HTML5, CSS3, and JavaScript.
- Implemented CRUD functionality for creating, updating, deleting, and managing tasks.
- Added task organization features for priorities, progress tracking, and daily workflow management.
- Used JavaScript arrays, objects, DOM manipulation, and event handling for task operations.
- Built a responsive and user-friendly interface for efficient task tracking across different screen sizes.

Education

Bachelor of Technology (B.Tech)—Computer Science & Engineering

2018—2022

Kirodimal Institute of Technology Engineering College, CSVTU University

Additional Learning

Data Structures & Algorithms — TypeScript — Modern React Development — GSAP & ScrollTrigger
